ALBION STONE

## 23-25 Soho Square, London W1

Architect/Designer:  
**Allies and Morrison**

Client:  
**Stanhope**

Main Contractor:  
**Davis Langdon and Everest**

Location:  
**Soho, London**

Portland Stone:  
**Bowers Basebed**

Scope of Project:  
**Refurbishment and extension of existing building.**

The project comprised an extension to the rear of the existing building to form an additional 401m<sup>2</sup> office space.

The front of the building was also re-clad with Portland Stone and contrasting brick work.

The project was valued in the region of £2 million and was completed in the Spring of 1997.

The specification for 23–25 Soho Square was for white Limestone cladding to contrast with the brick façade and complement the Portland

Stone on existing buildings in the surrounding area.

The Client considered a number of stones for the project including a French Limestone, however after reviewing the technical information available it was decided that Portland was the best option, given the requirement for a flat ashlar material, and to fit in with the surrounding buildings.

Albion Stone manufactured all the stones at their Portland Factory prior to being transported for site fixing.
