**Bloomsbury, London**

**Portland Stone:**  
**New Independent Whitbed  
and Basebed, Bowers Basebed  
and Roach**

**Scope of Project:**  
**7 storey extension to existing  
building.**

Albion Stone provided £6.7 million worth of Portland Stone in order to assist with Phase 1 of the Redevelopment plan at Great Ormond Street Hospital.

Phase 1 of the redevelopment was completed in 2006, transforming the experience of children, families and staff who use the new facilities.

It saw the opening of new clinical features, the patient and family hotel and improved outpatient facilities for some of our services within the neighbouring Royal London Hospital for Integrated

Medicine.

The patient and family hotel consisted of a 7 storey residential extension, existing of 30 rooms with kitchens and bathrooms.

The aim of Phase 1 was to help make a difference, making it possible for the hospital to provide the best treatment and care for more children in spacious, comfortable surroundings.

Albion Stone are proud to have helped make Phase 1 achievable.
