

portland stone - naturally

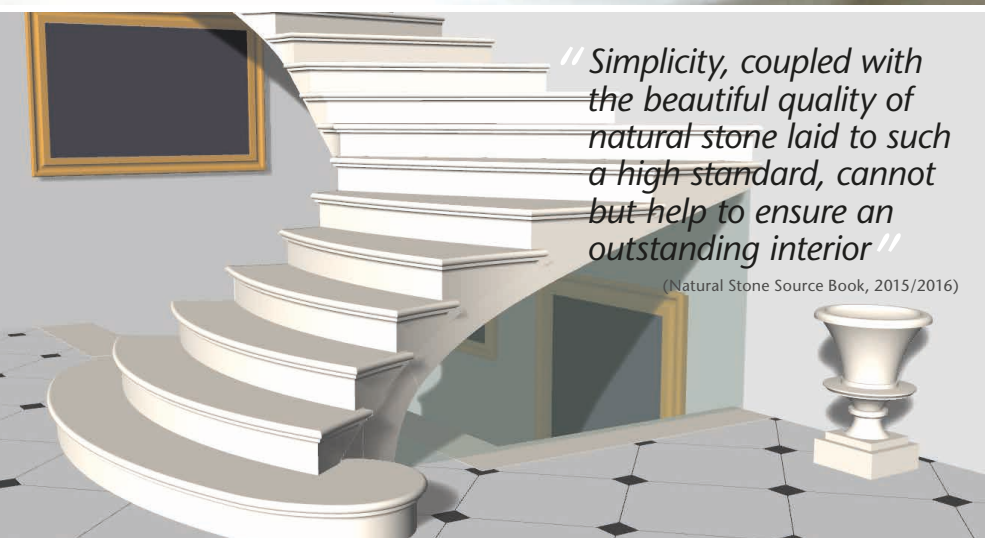

Private Residence Jersey

Awards: Winner of both Interior and Craftsmanship categories at the Natural Stone Awards 2014

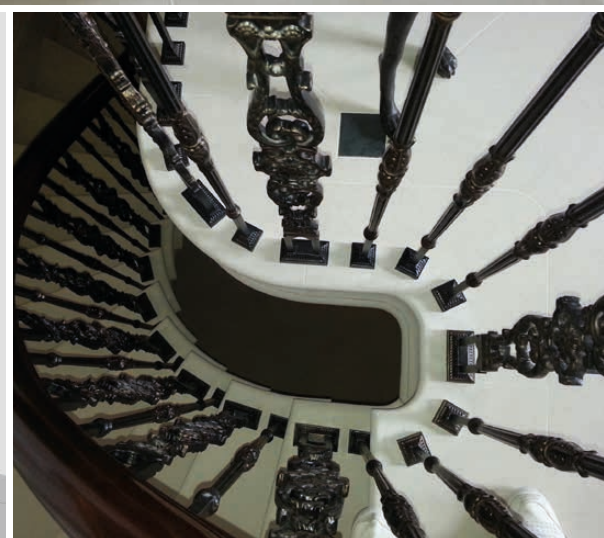

This newly constructed private residence, situated in the heart of Jersey highlights the versatility of natural Portland Stone. Jordans Basebed was used throughout this beautiful Georgian residence and is featured in a variety of applications, including 1000m² of stone flooring running throughout the property, three meticulously designed cantilevered staircase and treads and risers for the secondary staircase. Albion Stone provided the Portland Jordans Basebed block to Boden and Ward who carried out the detailed cutting, masonry and on-site fixing for a private client.

Boden and Ward quoted *'We think the results speak for themselves'*. This award winning project demonstrates how a traditional, robust stone infuses quality and helps transform a functional framework like a cantilevered staircase into a feature. Set stone floors were laid in what seems to be a minimalistic design yet when looking in further detail there is a subtle yet thoughtful arrangement of the paving stones. The colour of the traditional Portland stone helps form the appearance of space and encourages more light to travel around the property.

"Simplicity, coupled with the beautiful quality of natural stone laid to such a high standard, cannot but help to ensure an outstanding interior"

(Natural Stone Source Book, 2015/2016)

Architect/Designer: Sara Marsh, MS Planning Ltd Client: Private Client
Main Contractor: Houze Construction Ltd Principal Stone Contractor: Boden & Ward Stonemasons
Location: Jersey Portland Stone: Jordan's Basebed
Scope of Project: New Cantilevered staircase, Rear Staircase, Paving
