ALBION STONE

Ambika House, London W1

Architect/Designer:
Buckly Grey Yeoman

Client:
Chairman of Established and Sons

Main Contractor:
Blenheim House Construction

Location:
Portland Place, London

Portland Stone:
Bowers Basebed

Scope of Project:
Construction of new multi-story residential block.

Located in London's prestigious Portland Place, this ambitious residential project required careful planning to avoid disruption to a major London trunk route.

The works involved the construction of a new eighth floor, along with the structural alteration of the fifth and sixth floors of the existing rear west wing to provide a new 10,000ft² luxury penthouse residence for a high-profile client.

The contemporary, open plan penthouse has frameless fixed glazing and laminated

Portland Stone curtain walling, and is finished with exceptionally high quality fixtures and fittings.

Albion Stone supplied 60m³ of Portland Bowers Basebed for the project.
